Orem, Utah 84059

Subject: Five-Year Evaluation of Reclamation Surety, Geneva Rock Products, Inc., Corinne Quarry, M/003/0082, Box Elder County, Utah

Dear Mr. Edwards:

The last reclamation cost estimate for the Corinne quarry was completed in 2009 and escalated to 2014 with an escalation date of September 5, 2014, so the reclamation surety amount is now due for review and adjustment. The Division of Oil, Gas and Mining may adjust the amount of reclamation surety as the result of a periodic review taking into account inflation/deflation based on an acceptable cost index (R647-4-113.6).

The Division is not aware of any significant changes to the operations since the reclamation cost was originally calculated, but please update the Notice of Intention to Commence Large Mining Operations to reflect past changes and anything anticipated over the next five years.

The reclamation cost estimate should be calculated such that it provides adequate surety for at least the amount of disturbance anticipated over the next five years, and the LMO would need to reflect this. Please update the bond forms and return a copy to the Division for review. Once the forms have been reviewed, the Division will ask that you adjust the amount of surety to reflect the current reclamation cost estimate. **Please submit the reclamation cost estimate as an amendment to the Notice of Intention to Commence Large Mining Operations (LMO) by November 23, 2015.**

Thank you for your cooperation in keeping your reclamation surety current. Please contact Lynn Kunzler at 801-538-5310 if you have questions concerning this letter

Sincerely,

Paul B. Baker  
Minerals Program Manager
